Continuation of 5. does NOT place the application in condition for allowance because:

On pages 13-14, Applicant argues in essence:

"Because Katzman's operations are known by definition to reference the stack, there is no need to determine whether the operations references the stack. Therfore, Katzman fails to teach all the limitation of claims 12 and 26"

Applicant is correct in that Katzman's operations are known by definition to reference the stack. In order for Katzman's operations to reference the stack, the operations must inherently determine to reference the stack. Therefore this argument is moot.
